Overview

Putting solar panels directly on top of tiles is a no-go — they'll break. With the right equipment, proper planning, and professional installation, your tile roof can easily support a robust solar energy system. However, installing solar panels on tile roofs comes with unique challenges that require careful consideration. By prioritizing these factors, you can. The short answer is yes—but it requires careful planning and the right installation technique to ensure your roof remains intact and your solar system lasts for decades. The fragile nature of tiles, combined with the need for a secure, long-lasting, and leak-proof installation, requires specialized knowledge and equipment.
