

Photovoltaic panels torn into pieces

Overview

Common causes of solar panel damage are falling objects, thermal stress, and micro-cracks and scratches. Designed to endure everything from power surges to hailstorms, they're built to last. And here's a backdrop: Solar panels convert the sun's energy into usable electricity and are a primary component of solar energy systems. They're also the most vulnerable part when dealing with nature's elements.

Photovoltaic panels torn into pieces
