

Portable power cabinet lifespan comparison

Overview

So, how long do portable power stations last?

With typical Li-ion use: about 3–6 years before you notice a big drop in capacity. With LiFePO4 and good care: 8–10+ years is realistic for many users. If you only read one thing: runtime is mostly. How long can you rely on a portable power station before it fails?

The average lifespan ranges from 3 to 10 years, but this depends on critical factors like battery chemistry, usage habits, and maintenance. Typical lithium-ion stations last about 500–1000 cycles, while LiFePO4 models can reach 2000–6000+ cycles if cared for. This guide highlights five long-lasting models with lithium iron phosphate (LiFePO4) batteries, strong lifespans, and robust output. EcoFlow Delta 3 Plus Best on a budget 2.
