

Price of solar crystalline silicon modules

Overview

The PV Module Price Index tracks wholesale pricing and supply of crystalline-silicon modules that have fallen out of traditional distribution channels, and as a result are listed for resale on the EnergyBin exchange. For the fourth year, the price index findings shed light on the importance of polysilicon. A small number of new polysilicon orders have recently been concluded at lower price levels, mainly involving mid-tier producers. Lifetime estimates from NREL, RCT, and Fraunhofer ISE cost models. 09 million in 2026 and is projected to reach USD 5920. 7% from 2026 to 2033, reaching USD 100 Billion by 2033. According to the monthly index published by Germany's pvXchange Trading, the downward trend persists, driven largely—if not entirely—by Asian overproduction. The index focuses on the European market, which pvXchange has been monitoring since.
