

Price quote for 40-foot solar-powered shipping container for Australian farms

Overview

A basic 40-foot unit with essential equipment could run anywhere from \$30k-\$45k while high-tech versions equipped with advanced automation may cost upwards of \$85k. Here's a rough breakdown for better clarity: But remember folks, there is more to it than just initial costs. At SCS Australia, we supply advanced shipping container farms designed for all climates and locations. Using integrated indoor vertical farming and hydroponic technology, these mobile units let you grow fresh produce anywhere — from urban backyards to remote communities — without relying on. The average capital cost of building a solar farm in Australia ranges between \$1 million and \$3 million per megawatt(MW) of installed capacity. For the most accurate delivery cost, please call us or request a quote online.
