

Price quote for a 20kW solar-powered container for Australian farms

Overview

How much does a 20 kW solar system cost in Australia?

Many high-quality 20 kW systems in Australia in 2025 land around \$19,000-\$24,000, depending on component brands, installation complexity, and local incentives. Installed battery cost around \$1,200 per usable kWh. Residents in Perth typically enjoy the lowest cost for a 20kW solar system with. 20kW solar power systems are becoming an increasingly worthwhile and attractive investment for small to medium businesses (or households with very large energy consumption) across Australia, with payback periods in the 3-5 year range in most parts of the country. This amounts to roughly 2,400 kilowatt hours (kWh) of AC electricity every month, assuming at least five hours of sunlight per day. With a load of up to 16kW, this system is best suited for commercial organisations such as.
