

Prices for installing solar panels in Southern Europe

Overview

The 2025 Europe PV system pricing report covers solar capex for 15 major countries across residential, commercial and utility-scale segments. It includes detailed breakdowns for national average system costs for France, Germany, Italy, Spain and the UK across the three. Europe has quietly become one of the most competitive regions in the world for solar panel pricing. Thanks to a mix of supportive government policies, competitive installer markets, and a strong push for renewable energy, many European countries now offer some of the lowest solar panel prices. The cost of solar panels has dropped by more than 80% over the past decade, making them more affordable than ever. The total price depends on the size of the system, the type of technology, and where you live. Current market prices range from €8,000 to €16,000, with variations based on equipment quality, installation. This creates a simple question for single family homeowners: how much does a photovoltaic system cost today, and how large should it be to cover a family's real energy needs?

INFO BOX A single family home in Europe typically needs between 6 and 15 kWp of solar power, depending on household size. Average costs for solar photovoltaic (PV) installations typically range from €1,000 to €3,000 per installed kilowatt (kW), leading to an average installation cost of around €7,000 to €10,000 for a typical residential solar system. National incentives can drastically reduce upfront expenses. (More info. eu has a unique technology that allows you to select your own roof, see the prices for solar panels and their installation from local installers and calculate an expected.
