

# Rabat energy transition

## Overview

---

By 2030, Rabat aims for 52% of renewable energy in electricity production, and 96% by 2050. Rabat, The Gulf Observer: Morocco has announced a new partnership to fund 50 doctoral scholarships dedicated to energy transition and sustainable development, reinforcing the country's commitment to advancing research and innovation in sustainability fields. The latest report from the International Renewable Energy Agency (Irena) confirms that renewables, driven by solar and wind, now surpass fossil fuels in competitiveness, and this is sustainable. Minister of Energy, Leila Benali, and CDG's.
