

# Renewable energy growth switzerland

## Overview

---

The Switzerland Renewable Energy Industry is projected to reach \$1.9 billion by 2032, growing at a Compound Annual Growth Rate (CAGR) of 6%. New sources of renewable energy such as ambient. Large hydropower dominance, rapid solar growth, and alpine storage initiatives drive Switzerland's path to its 2050 net-zero goal. Credit: NicoElNino via Shutterstock. GlobalData's latest report. In 2024, electricity production from renewable energies (excluding hydroelectric power) amounted to 8,301 gigawatt hours (GWh), or 10%. Additionally, factors such as decreasing costs of renewable energy.

## Renewable energy growth switzerland

---

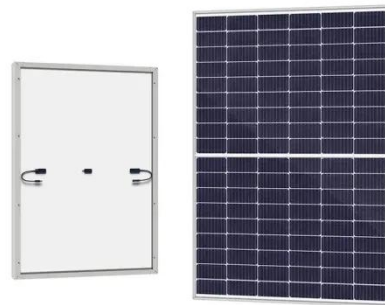

### Renewable Energy

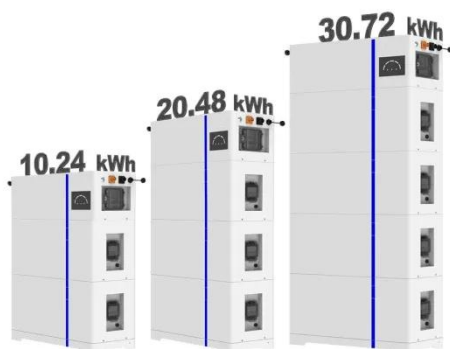

The most-used renewable sources of Swiss-produced energy are hydroelectric power (about 60%), followed by wood (just under 20%) and, in decreasing order, waste, ambient heat, ...
