

# Renewable energy storage mexico city

## Overview

---

Recently, the Mexican Ministry of Energy announced a new regulation mandating that all newly built wind and solar PV projects must be equipped with energy storage systems accounting for at least 30% of their capacity, with a minimum storage duration of three hours. In addition, with the right technologies and expertise, the country could increase energy storage and green hydrogen projects. Harnessing this potential could help to diversify the energy supply, lower the cost of electricity, and support companies that have strict sustainability objectives and are. The new rule requires solar and wind power plants to include battery systems with a capacity equivalent to 30% of their installed power, aiming to add 574 MW of storage by 2028. The capital will support clean energy. SilverBlue acquires the financing platform Solage and unveils a major investment plan focused on renewable energy projects for commercial and industrial customers across Mexico. SilverBlue has announced the acquisition of Solage, a financial vehicle specialised in funding distributed generation and.

## Renewable energy storage mexico city

---

### Mexico emerges as benchmark for energy storage development in ...

By combining specific regulations, a storage mandate for new renewable projects, and long-term planning, Mexico is emerging - according to OLADE - as a regional benchmark for energy ...

### SilverBlue Plans MX\$500M Renewable Energy Investment in Mexico
