

Small photovoltaic panels installed on the balcony

Overview

Balcony solar (also known as “plug-in solar”) consists of 1–3 portable, lightweight panels that attach to a balcony railing, patio, or fence. Unlike traditional solar, these systems: Plug into a standard 120V wall outlet using a specialized microinverter. The portable nature allows renters to take their investment when moving, making it ideal for apartment living. Financial. Thanks to new safety standards (UL 3700) and a wave of state-level legislation sweeping the country, more and more apartment dwellers and renters are finally gaining access to the benefits of solar power. They cut electricity bills, charge devices, and support eco-friendly living without requiring a full rooftop installation. Depending on how the panels are wired up, this energy is either stored in a battery or converted from DC to AC and fed back into the power grid.
