

# Solar Power Engineering Research Center

## Solar Power Engineering Research Center

---

### UCEP - An ECE Research Center

UCEP at Georgia Tech is dedicated to advancing the science, engineering, and commercialization of photovoltaic technologies.

---

### Photovoltaic Research Facilities

QESST is jointly funded by DOE, the National Science Foundation (NSF), and the Engineering Research Center (ERC) led by Arizona State University. QESST seeks to develop cost-competitive photovoltaics with ...

### The Latest in Power Generation News , Power Engineering

Nexttracker and the University of California Berkeley Engineering (UC Berkeley) have unveiled a strategic partnership aimed at advancing solar power plant technology by establishing the CALNEXT

---

### New research center to develop

## innovative solar power plant

UC Berkeley Engineering and Nextracker Inc. are partnering to launch the CAL-NEXT Center for Solar Energy Research, with the goal of developing sustainable, next-generation solar power plant ...

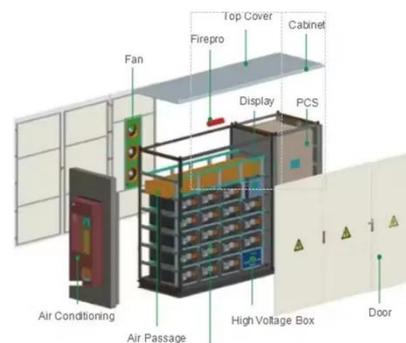

**2MW / 5MWh**  
**Customizable**

## University of Delaware's Institute of Energy Conversion (IEC)

Our outstanding talent, facilities and labs, and vast array of equipment allow for sophisticated research into thin-film based solar cells, photovoltaic systems and related engineering topics.

## Engineering Research Center of Solar Power and Refrigeration of

SPR is devoted to developing new technologies on solar energy utilization, more specifically, incubating new products and making them commercialized in corporation with well-known manufacturers.

## Nextracker and UC Berkeley create solar energy research facility

The CALNEXT Center for Solar Energy Research is dedicated to advancing solar energy technology by leveraging UC

Berkeley's academic expertise and research facilities.

### **TECO Clean Energy Research Center , University of ...**

The University of South Florida's TECO Clean Energy Research Center (CERC) explores and develops environmentally clean energy systems.

### **SDLE Research Center**

Technology developed at CWRU allows a building's energy use to be audited remotely, saving time and money. Learn about the Solar Durability and Lifetime Extension (SDLE) Research Center at Case ...
