

Solar Railway Power Plant

Home Energy Storage (Stackble system)

High Efficiency

Easy installation

Safe and Reliable

Perfect
Compatibility

Product Introduction

- Scalable from 10 kWh to 50 kWh
- Self-Consumption Optimization
- Integrated with inverter to avoid the compatibility problem

- LFP battery, safest and long cycle life
- Stackable design, effortlessly installation
- Capable of High-Powered
- Emergency-Backup and Off-Grid Function

Solar Railway Power Plant

Switzerland's first solar rail power plant goes live in Neuchâtel

Located in the village of Buttes in the canton of Neuchâtel, the pilot project marks a significant milestone in the development of innovative solar infrastructure integrated directly into the ...

Solar power on the tracks , SNCF Group

The world's first solar power plant on a working rail line We're joining forces with Swiss start-up Sun-Ways to explore how movable solar power generation equipment can be installed ...

Switzerland inaugurates world's first removable solar ...

The Swiss start-up Sun-Ways has inaugurated the world's first removable solar power plant built directly into an operational railway line.

Switzerland Pilots First Solar Power

Plant on Active Railway Tracks

In Switzerland, a solar technology startup is making use of open spaces between railway tracks to place solar panels. The panels can collect solar power, even with trains using the railway ...

Railway Tracks Turning into Solar Power Plants in Switzerland

Experts say using existing infrastructure like railways avoids taking up open land and helps meet solar goals without disturbing nature. If the Sun-Ways system succeeds, railway lines ...

Swiss Startup Stuns the World by Powering Trains With the First-Ever

...

A Swiss startup has achieved a groundbreaking milestone by launching the world's first photovoltaic solar plant on railway tracks, promising to revolutionize renewable energy integration in ...

smooth and stable system

How do solar railways work? Startup gets green light for

Solar panels are set to be rolled out "like carpet" on railway tracks in Switzerland

in a world-first. Swiss start-up Sun-Ways has been given the green light for a three-year pilot project in

Solar panels under a train? Switzerland starts testing first rail

Switzerland has launched what's billed as the world's first removable solar power plant on an active railway. Installed in the relatively unused space between the rails, the solar panels were ...

Switzerland turns train tracks into solar power plants

Projects in Germany, Italy, France and Japan are testing solar panels between the rails. However, the Swiss start-up is the first to have designed a removable system that can be placed on

Swiss startup activates world's first PV solar plant on railway tracks

Swiss startup Sun-Ways has launched the world's first removable solar power plant on active railway tracks, with

passenger trains set to run over the 18 kW installation starting April 28.
