

Solar container supporting

Overview

A container solar roof support is a structure that integrates solar panels onto the roof of a shipping container. All modules face same direction. This system can accept six-twelve solar modules, of either 60 or 72 cell format (modules not included). Can you put solar panels on a shipping container roof?

Absolutely!. LZY offers large, compact, transportable, and rapidly deployable solar storage containers for reliable energy anywhere. SolaraBox solar containers enable customers to achieve greater energy independence and reduce carbon emissions. Whether you're managing a construction site, a mining operation, or an emergency.
