

Solar panels installed on the original roof

Overview

Yes—it's possible, but it depends on the roof's structural condition. While age isn't always the issue, a roof with visible damage, leaks, or deteriorating materials can pose a risk to both the installation and the longevity of the solar system. **Should You Replace Your Roof Before Adding Solar Panels?**

When considering. Replacing a roof with solar panels is an effective way to reduce your carbon footprint and lower your utility bills. Even though there are some DIY solar panel options, installing them is a highly complex project, and you'll still need assistance from an experienced professional.
