

# Solar power generation and electricity sales income

## Overview

---

Unfortunately, selling your solar power to generate income is not a profitable option. Your solar energy system will save you. Discover the various ways solar companies generate income and contribute to the growth of the solar energy industry. Solar panel sales are a fundamental revenue stream for solar companies. These solar revenue streams business opportunities can transform a good solar investment into an exceptional one, often reducing payback periods by 12-24 months while increasing long-term profitability. Shareholders' Equity is defined as the company's total assets minus total liabilities. But, generally with support from government subsidies and favorable market conditions, most power producers can earn revenue via the following routes: Power Purchase.
