

Solar power stations in China

Overview

Data and information about Solar power plants and their location plotted on an interactive map of China. Wind and solar surpassed a quarter of China's electricity generation for the first time in April 2025. China is the largest market in the world for both photovoltaics (PV) and solar thermal energy. 60 MW phase IV under construction. Within a group of 1,000 MW of co-located plants Up to 2,000 MW when complete. Following phases with 550 MW planned.

Solar power stations in China

Solar by the Numbers: Midong Is China's Latest Mega-Marvel

Midong features 5.26 million 650-W monocrystalline bifacial double-glass photovoltaic (PV) panels. The facility's infrastructure includes more than 1.23 million supporting piles, five 220-kV

China adds 315 GW of solar in 2025 - pv magazine International

China installed a record 315 GW (AC) of new solar capacity in 2025, lifting cumulative installed PV capacity to 1.2 TW and pushing non-fossil power sources past thermal generation for the

...

A 10-m national-scale map of ground-mounted photovoltaic power stations

We provide a remote sensing derived dataset for large-scale ground-mounted photovoltaic (PV) power stations in China of 2020, which has high spatial resolution of 10 meters.

Largest solar power stations in

China

China is a solar energy hub that houses a number of the world's largest solar power plants. Over the last few years, China, which is the top emitter of greenhouse gases (GHG), has increased its share of ...

Solar Power Plants in China (Map)

Data and information about Solar power plants and their location plotted on an interactive map of China.

Solar Photovoltaic Power Stations in China

We provide a remote sensing derived dataset for large-scale ground-mounted photovoltaic (PV) power stations in China of 2020, which has high spatial resolution of 10 meters.

Solar power in China

A large part of the solar power capacity installed in China is in the form of large PV power plants in the west of the country, an area much less populated than the eastern part but with better

solar ...

Photos: The Scale of China's Solar-Power Projects

As the Trump administration's "Big, Beautiful Bill" eliminates many clean-energy incentives in the U.S., China continues huge investments in wind and solar power, reportedly accounting for 74

Top five solar PV plants in operation in China

Of the total global solar PV capacity, 40.73% is in China. Listed below are the five largest active solar PV power plants by capacity in China, according to GlobalData's power plants database.
