### **Solar radio flux**

Can we help you?

---

### **Solar Cycle Progression , NOAA / NWS Space Weather Prediction ...**

The observed and predicted Solar Cycle is depicted in Sunspot Number in the top graph and F10.7cm Radio Flux in the bottom graph. The predicted progression for the current solar cycle ...

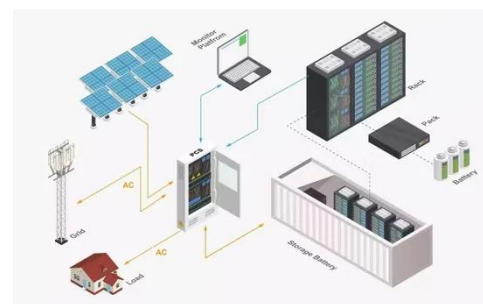

### Real-Time Propagation & Solar Flux Dashboard

Synoptic map example. Visual overview of solar regions & potential activity that can spawn flares or CMEs.

### Solar Cycle progression , Solar activity , SpaceWeatherLive

The graph below shows you the number of C, M and X-class solar flares that were produced during past month together with the sunspot number of each day. This gives you an idea of ...

### Solar Cycle progression , Solar activity , SpaceWeatherLive

Solar Cycle Progression  
 Number of C, M and X-Class Solar Flares Per Year  
 The Butterfly Diagram  
 Number of Spotless Days Per Year  
 Number of Days with A

## Applications

Geomagnetic Storm Per Year The graph below shows us the number of C, M and X-class solar flares that occur for any given year. It gives us a nice idea of the amount of solar flares in relation to the sunspot number. It is thus another way of seeing how a solar cycle evolved over time. This data comes from the NOAA SWPC and is updated daily. The graph below shows you the num See more on spaceweatherlive Missing: solar radio Must include: solar radio

## Sunspot Cycle Forecast and Current Optimal Frequency Chart for

Each chart displays the FOT (or Optimal Working Frequency) at each UTC hour, for the paths given. These radio frequencies are a percentage below the MUF (Maximum Usable Frequencies), and ...

## WM7D dot Net

This chart is based on the NOAA Geophysical Alert Message (updated every three hours). Included are the Solar Flux, K-Index, and A-Index numbers for the past six months.

## Solar Cycle Progression Update (Experimental Interactive Charts on ...

The observed and predicted Solar Cycle is depicted in Sunspot Number in the top graph and F10.7cm Radio Flux in the bottom graph. In both plots, the black line represents the monthly ...

## Solar Cycle Progression and Forecast

Each month the solar prediction is updated using historical and the latest month's observed solar indices to provide estimates for the balance of the current solar cycle and the next.
