

St George Resort uses off-grid mobile energy storage containers

ESS

Overview

In 2024, Texas rancher John installed two HighJoule 20-foot microgrid energy storage containers with a total capacity of 430kWh. After experiencing multiple grid outages, the system provides 80% of the ranch's energy needs and saves \$12,000 per year by participating in grid. An intelligent energy management system (EMS) oversees the entire microgrid, optimizing power generation, storage, and consumption. It prioritizes renewable energy use, minimizes reliance on backup generators, and ensures a stable power supply for all resort operations. Deploying solar microgrids. A 25kW off-grid solar kit is a comprehensive technology that produces and stores solar energy for off-grid uses. The systems are expanding in application where diesel delivery is not feasible, and grid access does not exist.
