

Standard requirements for energy storage battery containers

Overview

The 2026 edition of NFPA 855: Standard for the Installation of Stationary Energy Storage Systems has now been released, continuing the rapid evolution of safety requirements for battery energy storage systems (BESS). While BESS technology is designed to bolster grid reliability, lithium battery fires at some. The regulatory and compliance landscape for battery energy storage is complex and varies significantly across jurisdictions, types of systems and the applications they are used in. Since the first edition in 2020, each cycle has refined how the standard addresses. Sandia National Laboratories is a multimission laboratory managed and operated by National Technology & Engineering Solutions of Sandia, LLC, a wholly owned subsidiary of Honeywell International Inc. By integrating national codes with real-world project.
