

# Structural adhesive photovoltaic panels

## Overview

---

Can structural adhesives be used to install flexible and traditional solar panels?

Yes. Flexible solar PV panels can be attached directly to roofs, and conventional glass-faced solar panels may be installed by bonding the aluminum rails that hold them directly to the roof. Bonding and sealing of the aluminium frame to photovoltaic module. Utilizing structural adhesives for bonding flexible solar panels or aluminium rails eliminates the need for drilling holes in the roof, reducing the risk of leaks from rainwater. Neutral-cure silicones, structural adhesives, and thermal solutions designed to withstand UV exposure, heat cycling, vibration, and harsh outdoor conditions in solar energy systems. Enquire NOW!
