

Swaziland solar panel power generation subsidies

Overview

In 2022 the Eswatini Government has brought online a 10MW solar plant and will be awarding a solar generation license for the 50 MW to an IPP by late 2023. In collaboration with private entities and foreign aid programs, the Swazi government is taking crucial and necessary steps to advance its energy infrastructure and deliver power to the 17% of the population (more than 200,000 people) living without it. By investing in renewable energy and.

ESERA was established in terms of the Energy Regulatory Act, 2007. 3 of 2007) and the Petroleum Act, 2020. ESERA has the primary and core responsibilities of exercising control over the Eswatini Supply Industry (ESI). Eswatini is a 17,364 km² land locked country sharing most its borders with the Republic of South Africa, and with Mozambique to the east. 52°South and longitude 31. 47° East the country generally enjoys subtropical weather, with hot and wet summers and cold and dry winters. Eswatini's energy regulator ESERA on Monday launched the 20 MW Tsamela solar project, the first development under the country's 75 MW solar power program. The groundbreaking ceremony in Enduma was attended by members of the royal family, government officials, ESERA representatives, Standard Bank.

Renewables such as solar panels, wind turbines and hydroelectric dams generate electricity without burning fuels that emit greenhouse gases and other pollutants.
