

Tanzania electric vehicles

Overview

Electric cars are gaining traction in Tanzania in 2025, offering lower fuel costs, reduced maintenance, and a cleaner alternative to traditional vehicles. With over 5,000 EVs already on the roads and platforms like EV24. Here's what you need to know: Cost Savings: Driving an EV costs about TZS 6,000 per 100 km, compared to TZS 32,000. Tanzania is swiftly becoming a key player in East Africa's transition to electric vehicles (EVs). Despite the challenges, such as high import taxes and a need for improved infrastructure, the nation is making significant strides in the adoption of EVs. This framework aims to regulate the importation, registration, and usage of EVs across the country. EVs are cheaper to operate than gas cars, with charging costs at only 7% of fuel expenses.
