

The cost of shipping solar modules to containers

Overview

Short version: From 2024, it costs between \$2,800 and \$5,500 to ship a 20-foot container of solar panels around the world, depending on origin, destination, fuel prices, and demand. The 40-foot container, which is the one used for larger installations, ranges from \$4,500. Thinking of going solar and want to know how much it will cost to ship those panels in a shipping container?

You're not alone. With renewable energy on the rise, particularly among off-gridders, businesses, and environmentally minded homeowners, solar panel shipping logistics are growing more. ■ Transport cost shares currently high, due to disruptions in global logistics. Yeah, you heard that right – not 35. 21%, but three-thousand-five-hundred-twenty-one percent. Usually, it's 53 feet in length and 8. The next step is to calculate the number of pallets.

The cost of shipping solar modules to containers
