

# The wind was too strong and the wind turbine caught fire

## Overview

---

The incident took place at the Traverse Wind Energy Center in central Oklahoma. A video that captured the hypnotic scene has been shared on. Wind turbines are not without their hazards, as demonstrated by the recent fire at the Clements Gap wind farm in South Australia. This incident has brought to light the various factors that can lead to wind turbine fires, sparking discussions on how to mitigate these risks to ensure safer wind. The Country Fire Service says wind turbine fires are rare. But when turbines do catch fire, the ensuing spectacle of rotating flames and falling debris is impossible to ignore. Less transparent, though, is industry-wide data on details such as how many turbines burn down and the full cost of damages when they do. As the global need for energy.
