

# Uninterruptible power supply to Tbilisi communication base station shut down

## Overview

---

The results showed that the use of supercapacitors as a primary energy source reduced the delay time in load supply by 10 times, the response time in emergency situations decreased by 20-30%, and the overall efficiency of the base station increased by 1-1. APC PowerChute™ is a UPS management software enabling graceful system shutdowns and providing energy management capabilities. PowerChute. The stable operation of mobile communication networks directly depends on the uninterrupted and reliable supply of electricity to base stations. Many UPS models continually condition incoming power as well. Uninterrupted power supply to base stations increases the quality and reliability of network services. According to the guidelines from the German Federal Office for Civil Protection and Disaster Assistance critical infrastructures, such as.
