

# What are the electrical appliances that use solar power

## Overview

---

Solar power can run nearly any appliance, including lights, refrigerators, air conditioners, and even washing machines, depending on your system's size and energy storage. But. Solar panels used for homes consist of interconnected photovoltaic cells that convert power from the sun's rays into electricity. These panels create energy, which is subsequently utilized to power lights and household equipment. Whether it's an electric vehicle charger, washer and dryer, solar water heater, or heat pump water heater, if it runs on electricity you can power it with clean, renewable energy from the sun. Key figures! During the second quarter of 2023, the capacity added to the solar market in the.
