

# What are the solar inverters exported

## Overview

---

-manufactured Single SKU inverters are currently being exported to Italy, France and the Netherlands, with shipments of commercial and industrial (C&I) solar products from Florida also on track to begin in early 2026. SolarEdge has started shipping US-made residential solar inverters to Europe – a milestone as US solar manufacturers look for export upside amid shifting trade rules, tariffs, and fading domestic manufacturing incentives. -- (BUSINESS WIRE)-- SolarEdge Technologies, Inc. (NASDAQ: SEDG), a global leader in smart energy technology, today announced the latest milestone in its international manufacturing and export strategy with the shipment of single-phase residential inverter products from its Austin. The majority of home appliances and industrial machinery use alternating current (AC) power, which is produced by inverters, which are electrical devices that change direct current (DC) electricity, usually produced by solar panels, batteries, or other renewable sources, into AC electricity. As per. SolarEdge announced its first international shipments are now underway from its U.
