

# What are the solar panels in a solar sun room

## Overview

---

Because of their location, the roof of a sunroom is a terrific place to install solar panels. A sunroom is a small room, often on the ground floor of a home, that is designed to be used as an additional living area. Sunrooms are popular in climates with cold winters because they provide warmth and sunshine all year round. The most common type of sunroom has windows facing south or west for. That's the promise of integrating photovoltaic (PV) panels into sunrooms - but does this marriage of aesthetics and energy efficiency actually work?

Let's cut through the solar jargon and explore what happens when you turn your leisure space into a power plan HOME / Are Photovoltaic Panels in. It includes solar room ideas and design information, as well as construction drawings and some example photos of solar rooms. The entire book, covering many aspects of passive solar energy can be downloaded [here](#).
