

What is the appropriate price for purchasing photovoltaic panels yourself

ESS

Overview

Since your typical solar panel system size is 6.5 kW, anticipate spending around \$3,900 for the panels alone, or somewhere between \$1,950 and \$5,900. However, system sizes range from 3 kW to 11 kW, so you could see prices for as little as \$900 or as much as \$8,800. Most homeowners spend between \$12,600 and \$33,376 to install a complete residential solar system in 2026, with the national average at \$19,873 before incentives. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. As of 2026, the average cost of residential solar panels in the U.S. is 50¢ per watt of installed capacity (more on price per watt below). What is. Solar panels cost about \$21,816 on average when purchased with cash or \$26,004 when purchased with a loan for a 7.
