

# What kind of outdoor solar energy is it

## Overview

---

Outdoor solar lighting systems use solar cells, which convert sunlight into electricity. The electricity is stored in batteries for use at night. It reduces reliance on fossil fuels, 3. Installation can. These lights harness the power of the sun to provide illumination for outdoor spaces, without the need for traditional electrical wiring or batteries. People have used the sun's rays (solar radiation) for thousands of years for warmth and to dry meat, fruit, and grains.
