

# What outdoor power supply should I use in Uganda

## ESS

## Overview

---

Uganda uses a standard voltage of 240 volts and a frequency of 50 Hz. The country uses plug type G, which is a three-pin plug with two round pins and a larger, rectangular earth pin. Bring a Type G power adapter to Uganda if the plug you would like to use doesn't fit into a Ugandan power outlet. The type of plug adapter, power converter or charger that's needed when visiting Uganda all depends on the voltage and type of device that you're attempting to power in a Ugandan power. Summary: This article explores practical strategies for outdoor power supply installation in East Africa, focusing on solar energy adoption, rural electrification challenges, and data-backed success stories. Learn how hybrid systems are transforming energy access across Kenya, Tanzania, and Uganda. Yes, you. If you are staying on the Hairy Lemon Island, solar charging is generally available (depending on the weather) for a limited number of hours in the morning. The power can fluctuate and we recommend using a surge protector.
