

Woodward Microgrid

Woodward Microgrid

easYgen-3000XT

Simplifies the integration of small-scale microgrids and optimizes large-scale systems through collaboration with Woodward's easYi product. (Photovoltaic, Batteries, Gensets,) Use the device's ...

SolarTAC Upgrades Microgrid Testing LOCATION Environment ...

Backed by decades of experience with generator controls, load sharing, synchronization, and power protection technologies, Woodward's power generation control solutions set standards worldwide.

Microgrid HIL Testbed with Woodward easYgen controller-in-the-loop

In this webinar, we will examine the most important control modes of the Woodward easYgen. We also show how remote breaker operator LS5 can enhance microgrid functionality; finally, we demonstrate ...

Woodward's Off-Grid Microgrid Solution for Morgan Sawmill

Woodward Case of Study: Off-Grid Power. Proud to share a recent success story - the implementation of a fully off-grid microgrid system for Morgan Sawmill in South Australia.

Diesel Generator Controller Evaluation via Controller-Hardware-in ...

The model of the diesel generator (governor, exciter, and primary control) is simulated in real time, and the secondary control is implemented in a real hardware controller, the Woodward easYgen, which is ...

easYi , easYgen 3000

Woodward's easYi works as a lower "level 2" controller. Meaning our customers build, design and commission "level 3" supervisory controls / Microgrid controls / energy managers.

easYi , Woodward

Capability for simulation of the control system before project realization, work through realistic use-cases before

commissioning including the interconnection to your Microgrid, Supervisory command and ...

Microgrid HIL Testbed Webinar

Download this recorded webinar from Typhoon HIL to learn more about Microgrid HIL Testbed with Woodward easYgen controller-in-the-loop demonstration.

Woodward Power Generation Products

Our customers design, own and operate utilities, microgrids, data centers, commercial and institutional facilities, and power plants. Whether generating electricity for distribution to the grid or their own ...
